4. ***We require certain approvals and licenses in the ordinary course of business and are required to comply with certain rules and regulations to operate our business, and the failure to obtain, retain and renew such approvals and licences or comply with such rules and regulations, and the failure to obtain or retain them in a timely manner or at all may adversely affect our operations.***

Our Company requires several regulatory licenses and approvals for operating its business. It is subject to a number of transportation laws and regulations which are liable to change based on new legislation and regulatory initiatives. Our Company is required to comply with various regulations in connection with restrictions which specify the actual weight to be carried by our vehicles, permissible emission limits or restrictions on the age of vehicles operating within certain States. Many of these approvals require renewal from time to time. Though the application for renewal of existing licenses/approvals will be made to the respective authorities as and when required, there can be no assurance that the relevant authority will renew any of such licenses/approvals. If our Company does not receive the requisite approvals/licenses, our business operations may be adversely affected.

Further, these permits, licenses and approvals are subject to several conditions and our Company cannot assure that it shall be able to continuously meet the conditions and this may lead to cancellation, revocation or suspension of relevant permits, licenses and/or approvals. Failure by our Company to renew, maintain or obtain the required permits, licenses or approvals may result in the interruption of our Company's operations and may have a material impact on our business. For further details regarding statutory approvals, please refer to the chapter titled "Government and other Key Approvals" on page no. 204 of this Prospectus.

5. ***An upward trend in the prices of the fuel and our inability to pass the cost of fuel to our customers could adversely affect our operations and profitability.***

Fuel costs form an integral component of our operating cost. In the FY 2017-18, fuel cost comprised 31.96% of the our total operating costs. Thus, our results of operation and financial condition depend substantially on the price of fuel. The prices of such fuels, which are petroleum products, in turn, depend on several factors beyond our control, including, inter alia:

- The international prices of crude oil and petroleum products,
- Global and regional demand and supply conditions,
- Geopolitical uncertainties,
- Import cost of crude oil,
- Central and State government policies and regulations concerning pricing, subsidies,
- Price and availability of alternative fuels and technologies,

The price of crude oil and petroleum products has risen significantly over the years and is on the rising trend.

In view of the above, we are exposed to the impact of frequent fluctuations in fuel prices. In the event of rise in fuel prices, we may not be able to pass on this increase in price to our customers either wholly or partly, which would adversely affect our profit margins. Further, we may not be able to accurately gauge or predict the volatility and trends in fuel price movements which may affect our business plans and prospects, growth estimates, financial condition and results of operations.

6. *Our funding requirements and deployment of the issue proceeds are based on management estimates and actual cost may vary compared with the estimated amount.*

Our funding requirement and deployment of the proceeds of the Issue are based on management estimates and our current business plan. The fund requirements and intended use of proceeds have not been appraised by banks or financial institutions and are based on our estimates. In view of the highly competitive nature of the industry in which we operate, we may have to revise our management estimates from time to time and, consequently, our funding requirements may also change as a result of various factors which may not be within the control of our management. This may entail rescheduling, revising or cancelling the planned expenditure and fund requirement and increasing or decreasing the working capital limits maintained from time to time at the discretion of our board. In addition, schedule of implementation as described herein are based on management's current expectations and our subject to change due to various factors some of which may not be in our control. The deployment of the funds towards the objects of the issue is entirely at the discretion of the Board of Directors and is not subject to monitoring by external independent agency.

7. *Trade Receivables form a substantial part of our current assets and net worth. Failure to manage our trade receivables could have an adverse effect on our net sales, profitability, cash flow and liquidity.*

We are engaged in goods transportation service for diversified customers. Our business is working capital intensive and hence, trade receivables form a substantial part of our current assets and net worth. The results of operations of our business are dependent on our ability to effectively manage our trade receivables.

To effectively manage our trade receivables, we must be able to accurately evaluate the credit worthiness of our customers and ensure that suitable terms and conditions are given to them in order to ensure our continued relationship with them. However, if our management fails to accurately evaluate the credit worthiness of our customers, it may lead to bad debts, delays in recoveries and / or write-offs which could lead to a liquidity crunch, thereby adversely affecting our business and results of operations. A liquidity crunch may also result in increased working capital borrowings and, consequently, higher finance cost which will adversely impact our profitability.

8. *Our business completely relies on road transport and any disruptions/ delays could negatively affect us and lead to a loss of reputation and/ or profitability.*

Our business completely relies on road transport for its operations. There are various factors which affect road transport such as political unrest, communal riots, bad weather conditions, natural calamities, regional disturbances, negligent driving, improper conduct of the drivers, theft, accidents or mishaps, communal violence, third party negligence, pilferage, and other reasons. Some of these factors could cause extensive damage and affect our operations and/ or the condition of our fleet and thereby increase our maintenance and operational cost. Also, any such interruption or disruptions could cause delays in the delivery of our consignment at its destination and/ or also cause damage to the transported goods. We may be held liable to pay compensation for loss incurred by our customers in this regard, and/ or losses or injuries sustained by other third parties. Further, such delays and/ or damage may cause a loss of reputation, which, over a period of time could lead to a decline in business. In the event that the goods to be delivered are perishable in nature, any delay in the delivery of such goods also exposes us to additional loss and claims. Although, some of these risks are beyond our control, we may still be liable for the condition of these goods and their timely delivery and any disruptions/ delays could negatively affect us and lead to a loss of reputation and/ or profitability.

9. *We have certain contingent liabilities which could adversely affect our financial condition. Crystallization of any of these contingent liabilities may adversely affect our financial condition.*

As of March 31, 2018, our contingent liabilities as indicated in our Restated Financial Statements and also certified by our statutory auditors were as follows:

(₹ in lakhs)

Particulars	For the Period Ended June 30, 2018	As at March 31,				
		2018	2017	2016	2015	2014
On Pending Litigation						
Income Tax	42.80	42.80	29.06	77.73	-	-
Service Tax	2062.29	2062.29	2062.29	1507.80	1507.80	-
On other than Pending Litigation						
Bank Guarantee	-	-	19.47	-	-	-
Total	2,105.09	2,105.09	2110.82	1585.53	1507.80	-

We believe these claims will be dismissed, But in the event that any of our contingent liabilities materialize, our business, financial condition and results of operations may be adversely affected. Furthermore, there can be no assurance that we will not incur similar or increased levels of contingent liabilities in the current fiscal year or in the future. For further information, please refer “Annexure XXIX Contingent Liability” on page no. **Error! Bookmark not defined.** of this Prospectus.

10. Claims relating to loss or damage to cargo, personal injury claims or other operating risks that are not adequately insured may adversely affect our business, results of operations and financial condition.

Our business is subject to various risks inherent in the logistics industry, including potential liability to our customers which could result from, among other circumstances, injury to drivers or damage to property arising from accidents or incidents involving vehicles operated by us.

In addition, some costs like payments to intermediaries, facilitation payments made at check posts and police authorities may expose us to claims or liability which may not be adequately covered under insurance. In our goods transportation business, we may be exposed to claims related to cargo loss, theft and damage, property and casualty losses and general liability from our customers.

We typically do not secure insurance coverage for the goods transported by us. In the event of any damage or loss of goods, we may be required to compensate our customers.

While we endeavour to recover such losses, as well as related loss of freight, by auctioning the damaged goods, there can be no assurance that we will recover any such losses.

Although we attempt to limit and mitigate our liability for thefts and/or damages arising from negligent acts, errors or omissions through contractual provisions and/or insurance, the indemnities set forth in our contracts and/or our insurance may not be enforceable in all instances or the limitations of liability may not protect us from entire liability for damages.

While we maintain insurance coverage at levels and for risks that we believe are customary in the goods transportation and packing and moving industry in India, there can be no assurance that there will not be any claims relating to loss or damage to cargo, personal injury claims or other operating risks that are not adequately insured. There can also be no assurance that the terms of our insurance policies will be adequate to cover any such damage or loss suffered or that such coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim.

Furthermore, any accident or incident involving our vehicles, even if we are fully insured or held not to be liable, could negatively affect our reputation among customers and the public, thereby making it more difficult for us to compete effectively, and could significantly affect the cost and availability of insurance in the future. To the extent that any such uninsured risks materialize, our business, results of operations and financial condition may be materially and adversely affected.

Further, our Company is required to renew these insurance policies from time to time and in the event, we fail to renew the insurance policies within the time period prescribed in the respective insurance policies or not obtain at all, our Company may face significant uninsured losses. If our Company suffers a large uninsured loss or if any insured loss suffered, significantly exceeds our insurance coverage, our business, financial condition and results of operations may be adversely affected.

Further, we have not obtained any insurance for properties owned by us or on lease. Losses due to hazards, theft, fire etc. in these properties will be borne by us and significantly impact our operations and our financial conditions.

11. Lack of experienced drivers in the market may adversely affect our business, results of operations and financial condition.

Our goods transportation and packers and movers business are significantly dependent on our ability to attract, recruit and retain a sufficient number of experienced drivers. We face significant competition in attracting, recruiting and retaining experienced drivers. A shortage of experienced drivers in the transportation industry could force us to further increase driver compensation, which could reduce our profit margins or hire third-party owned trucks, which may not be available at commercially viable rates or at all. A shortage of drivers for our operations could affect our ability to meet delivery schedules or provide quality services. Further, we may be forced to increase our reliance on hired transportation, decrease the number of pickups and deliveries we are able to make, increase the number of our idle vehicles or limit our growth, any or all of which could have a material adverse effect on our business, results of operations and financial condition.

12. Our Company has not obtained local licenses or government approvals required for some of the strategic transshipment hubs / depots used in our operations.

Our operational infrastructure for the goods transportation business, as of March 31, 2018, comprised of various types of premises, such as registered office, corporate office, branch offices, transshipment hubs / depots etc. The said transshipment hubs / depots, which are Forty Six and are spread across various States, are operated on a sharing basis with local associates and the rentals are borne by us. Since the strategic transshipment hubs / depots are being used on sharing basis and we do not carry out any billing / revenue activity from such location; we believe that we need not obtain any specific licenses/approval from the local municipal authority in our Company's name for using strategic transshipment hubs / depots on sharing basis. However, we cannot assure that the concerned authority will concur with our opinion. In such a situation we may be called upon to comply with the local laws with respect to obtaining approvals/licences.

13. We have issued Equity Shares in the last 12 months at a price which is lower than the Issue Price.

During the last one year, we have issued Equity Shares at a price that is lower than the Issue Price as set out in the table below:

Sr. No.	Name of Allottee	Date of Allotment	No. Of Equity Shares	Issue Price	Reason
1.	Mr. Anjani Kumar Agarwal	July 01, 2018	945450	Nil	Bonus Allotment
2.	Mr. Sanjay Agarwal		708950		
3.	Mr. Dayanand Agarwal		2199967		
4.	Mrs. Shamantha Dodla		6		
5.	Mrs. Pinky Agarwal		6		
6.	Mr. Sridharan		6		
7.	Mr. Sugan Chand Sharma		6		
8.	Mrs. Shashikala Agarwal		6		
9.	Mrs. Sunita Agarwal		6		

For further details please refer to “Capital Structure” on page no. 52 of the Prospectus

14. Our goods transport business is subject to certain taxes, which may significantly affect our profits.

Our goods transport business has a multiplicity of taxes as taxes are levied at the Union level, State level and at the local administration level. The various taxes which are levied on our Company include: national tax by the Union Government; Motor Vehicle Tax, and goods tax by the State Government and octroi and tolls by the local body.

15. The increase in the age of our vehicles and an increase in the prices of new vehicles may adversely affect our business and results of operations.

As of March 31, 2018, approximately 54% of our owned goods transportation vehicles were over five years. As the age of our fleet increases, we expect maintenance costs related to our fleet to also increase. We may also have to acquire new vehicles to expand our business or to manage operational efficiencies and reduce cost of maintenance. Unless we continue to expand and upgrade our fleet of goods transportation vehicles and acquire such vehicles on commercially favourable terms, our aging fleet may result in increased operating and maintenance costs. In case we have to purchase new transportation vehicles / trucks, we will have to incur capital expenditure or avail vehicle loans. We cannot guarantee that we will be able to do so on favourable terms, or in a timely manner, or at all. Further, in case purchase of new vehicles, we will also incur increased depreciation expenses which may adversely affect our results of operations.

16. *Certain Portion of IPO Proceeds will be used to repay loans taken from of our Promoters and our Promoter Group Company.*

We intend to use certain portion of the proceeds from the Issue to repay loans taken from of our Promoters Mr. Sanjay Agarwal, Mr. Anjani Kumar Agarwal and our Promoter Group Company MDN Edify Education Private Limited. The purpose of these loans were to fund general business expenditures as and when funds were required by the Company. For details, refer Objects of the Issue on page no. 61 of this Prospectus.

17. *Our Company has entered into certain related party transactions in the past and may continue to do so in the future, which may potentially involve conflicts of interest with the equity shareholders.*

Our Company has entered into certain transactions with our related parties including our Promoters, Promoter Group, Directors and their relatives. For example, we had taken loans from group companies aggregating to Rs. 401.71, Rs. 115.51 lakhs, 101.32 lakhs, 131.15 lakhs, 178.25 lakhs for the period ended June 30, 2018 and in the financial year ended 2018, 2017 and 2016, 2015 respectively. Further, we have given loans of Rs. 2,970.48, 1,389.91, 492.04, 63.35 lakhs in the financial year ended 2018, 2017 and 2016, 2015 respectively.

Furthermore, it is likely that we may enter into related party transactions in the future. We cannot assure you that such transactions, individually or in the aggregate, will always be in the best interests of our minority shareholders and will not have an adverse effect on our business, results of operations, cash flows and financial condition. For details, please refer "Financial Statements – Related Party Transactions" on page no. **Error! Bookmark not defined.** of this Prospectus.

18. *We depend on a limited number of customers for a significant portion of our revenues. The loss of a major customer or significant demand of our services from our major customers may adversely affect our business, financial condition, results of operations.*

We are depend on some large customers for business and if they discontinue business with us it could impact our turnover, resulting in a decline in our revenues.

Our business is such that some of large corporate give us large orders and in future they may or may not give us such orders.

Further, we face immense competition from other transporters and logistic service providers, organised as well as unorganised, which may result in some of our customers reducing their orders to us. Any reduction in orders from our existing clients may result in a decline in our revenues.

While we are constantly striving to increase our customer base and reduce dependence on any particular customer, there is no assurance that we will be able to broaden our customer base in any future periods or that our business or results of operations will not be adversely affected by a reduction in demand or cessation of our relationship with any of our major customers.

19. *The transport industry is affected by numerous factors that are o beyond of our control.*

Businesses operating in the transport industry are affected by numerous factors that are out of their control, including weather conditions, both as currently experienced and as might be experienced due to climate change, traffic conditions, road closures and construction-related and other delays. Further, time-consuming and complex border-crossing procedures cause significant journey time delays and poor journey time reliability on road movements. These events cause additional costs, both in terms of actual fees and charges for services provided, and as a result of time delays and unreliability in delivery. We cannot assure you that these factors and conditions will not delay our cargo deliveries and delivery of our packing and moving services, impact our ability to operate without disruption or

otherwise have a material adverse effect on our business, financial condition and results of operations. In addition, many local, state and central transportation authority's levy tolls on vehicles for their use of highways and other roads. As the need for improvements to these highways and other roads arise, we expect that many of these tolls may be increased and that other transportation authorities will levy additional tolls and fees on vehicles for use of the roadways. We cannot assure you that we will be able to pass any portion these expenses on to our customers, and any failure to do so could have a material adverse effect on our business, financial condition and results of operations.

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If our Company is not able to generate sufficient cash flows, it may adversely affect our business and financial operations.

26. Our Company has availed unsecured loan from our related parties which are repayable on demand. Any demand from the lender for repayment of such unsecured loan may affect our cash flow and financial condition.

Our Company, as per the restated audited financial statement as on June 30, 2018 has availed total sum of ₹ 2515.49 lakhs as unsecured loan from related parties which may be recalled at any time. Sudden recall may disrupt our operations and also may force us to opt for funding at higher interest rates, resulting in higher financial burden. Further, we will not be able to raise funds at short notice and thus result in shortage of working capital fund. For further details, please refer to the section “Unsecured Loans” under “Financial Statements” beginning on page no. 135 of this Prospectus. Any demand for the repayment of such unsecured loan, may adversely affect our cash flow and financial condition.

27. We operate in a highly competitive industry and, if we are unable to adequately address factors that may adversely affect our revenue and costs on account of increased competition, our business would suffer.

We operate in a very fragmented, unorganized and competitive industry. Increased competition may lead to revenue reductions, reduced profit margins, or a loss of market share, any one of which could harm our business. There are many factors that could impair our ability to maintain our current profitability, including the following:

- (a) competition with other companies offering complete logistic solutions, some of which may develop a broader coverage network, and greater capital resources than we do;
- (b) reduction by our competitors of their freight rates to gain business, especially during times of declining growth rates in the economy, which may limit our ability to maintain or increase freight rates, maintain our operating margins, or maintain significant growth in our business;
- (c) solicitation by customers of bids from multiple carriers for their transportation needs and the resulting reduction of freight rates or loss of business to competitors;
- (d) development of an operational model similar to ours by a competitor with sufficient financial resources and comparable experience in the logistics services industry;
- (e) establishment of better relationships by our competitors with their customers; and
- (f) the small unorganized players at a regional level may not comply with applicable statutory and regulatory requirements and due to which they may be able to operate at lower cost and consequently offer lower prices than us.

If we are unable to effectively compete with other players in the goods transport industry, whether on the basis of pricing, services or otherwise, we may be unable to retain existing customers or attract new customers, which could have a material adverse effect on our business, financial condition and results of operations.

28. *Our current Debt Equity Ratio is high.*

Our Company's debt to equity ratio as on June 30, 2018 is 4.89 which is higher than 2 and hence there is a risk of being over leverage and our debt includes both secured and unsecured loans. We believe bringing this issue will help us repay the unsecured loans and reduce the ratio. However, our inability to bring the issue will impact our Financial conditions.

29. *We are dependent on various third parties for adequate and timely supply of equipment and maintenance of our vehicles, and any delays or increases in cost related thereto may adversely affect our business.*

We are dependent upon certain key suppliers and vendors for our vehicles and equipment including our goods transportations vehicles, trucks, buses, tyres, materials required to design and build bodies for our vehicles, and associated equipment and spare parts. There can be no assurance that such suppliers will continue to supply such vehicles, equipment, spares, tyres or other materials in quantities or prices that are commercially acceptable to us or at all. Events beyond our control may have an adverse effect on the cost or availability of raw materials, components and spare parts.

In addition, we have entered into certain arrangements with Ashok Leyland Limited and VE Commercial Vehicles Limited and Tata Motors Limited. These arrangements enable us to significantly reduce inventory costs and transportation costs for spares and also enable us to ensure supply of spare parts and regular and quality maintenance of our vehicles in a timely manner.

In the event Ashok Leyland and/or Tata Motors Limited and/or VE Commercial Vehicles Limited or any other significant supplier discontinue our existing arrangements, there can be no assurance that we would be able to procure similar quality vehicles, chassis, equipment, spares and other materials from a comparable supplier at commercially viable rates or at all.

30. *Our branches (including our transshipment hubs) are located at leased premises. Our operations may be materially and adversely affected if we are unable to continue to utilize any of our key branches or transshipment hubs.*

Our business and operations are significantly dependent on the hub-and-spoke operating model and the integrated consignment delivery network built around our branches and transshipment hubs across India. Our branches (including our transshipment hubs) are located at leased premises. We have entered into various lease arrangements for such branches and/or transshipment hubs. If we are unable to continue to use our branches and transshipment hubs which are located on leased premises during the period of the relevant lease or extend such lease on its expiry on commercially acceptable terms, or at all, we may suffer a disruption in our operations which could have a material and adverse effect on our business, results of operations and financial condition.

31. *We have applied for certain approvals / registrations. Our failure to get such approvals / registrations may have an adverse impact on our business operations.*

We have applied for registration of Trade Licences for our branch offices situated at Hyderabad and Cochin. Further, we are in process for renewal of trade license for our Kolkata Branch. Unreasonable delay in the said registrations may have an adverse effect on our business operations and results of operations.

Unreasonable delay in obtaining the said registrations may have an adverse effect on our business operations and results of operations.

32. *There are various negative covenants in the sanction letters issued to us by our lenders, which could put us at a competitive disadvantage and could have an adverse effect on our business, results of operations and financial condition.*

The sanction letters issued to us contain provisions that restrict our ability to do, among other things, any of the following:

- Our Company shall not during the tenure of Loan enter into any scheme of merger, amalgamation, compromise or otherwise or amalgamate the underlying property with any other property and neither shall alter its MOA, AOA, its Board of Directors and Shareholding Pattern.
- Our Company shall not stand as surety for anybody or guarantee the repayment of any loan or the overdraft or purchase price of any asset.
- Our Company shall not induct in its Board any person as Directors who has been found Defaulter / Wilful Defaulter by any regulatory body or if any such person is already on Board, the Company shall take effective remedial actions.
- Our Company shall not use the Loan for any speculative, illegal or antisocial purpose or a purpose other than the purpose
- Our Company shall not induct in its Board any person as Directors who has been found Defaulter / Wilful Defaulter by any regulatory body or if any such person is already on Board, the Company shall take effective remedial actions.

Further the company has created a charge on its assets in favour of its bankers. In case of default by the company in repayment of the loans, bankers may exercise their rights over the security, which may be detrimental to the interest of the company. For details, please refer "Financial Indebtedness" on page no. 193 of this Prospectus.

Also, we are required to obtain the required consents of the lenders before undertaking certain significant corporate actions. We cannot assure you that the lenders will grant the required approvals in a timely manner, or at all. The time required to secure consents may hinder us from taking advantage of a dynamic market environment. In addition to the restrictions listed above, we are required to maintain certain financial ratios under our financing agreements. These financial ratios and the restrictive provisions could limit our flexibility to engage in certain business transactions or activities.

Additionally, our borrowings are secured by our movable, immovable or tangible assets (whether existing or future) and by a personal guarantee of our Promoter / Promoter Group. Such securities enable the lenders to cancel any outstanding commitments, accelerate the repayment, exercise cross default provisions and enforce their security interests on the occurrence of events of default such as a breach of financial covenants, failure to obtain the proper consents, failure to perfect security as specified and such other covenants that are not cured. It is possible that we may not have sufficient funds upon such an acceleration of our financial obligations to pay the principal amount and interest in full. Further, if we are forced to issue additional equity to the lenders, your ownership interest in our Company will be diluted. It is also possible that future financing agreements may contain similar or more onerous covenants and may also result in higher interest cost.

If any of these events were to occur, our business, results of operations and financial condition may be adversely affected.

33. *Our Promoters Mr. Anjani Kumar Agarwal and Mr. Sanjay Agarwal control our Group Companies and our Promoter Group Entities and any default made by the Group Companies / Promoter Group Entities will also impact our Company.*

Our Promoters Mr. Anjani Kumar Agarwal and Mr. Sanjay Agarwal are also Directors / Promoters of our Group Companies and other entities forming part of our Promoter Group. There may be situations in which they are unable to allocate sufficient time to our Company or effectively participate in the management of our Company, which could have a material adverse effect on our business.

Further, any defaults or negative incident involving these Companies may impact the Goodwill or fund raising capabilities of our Company which could have a material adverse effect on our business operations and financial conditions.

34. *Claims relating to accident or damage to third party resulting in personal injury, death or loss that are not adequately insured may adversely affect our business, results of operations and financial condition.*

Our business is subject to various risks inherent in the logistics industry, including potential liability to our clients which could result from among other circumstances, personal injury or damage to property arising from accidents or incidents involving vehicles operated by us. Our drivers as well as other users are subject to the risk of accident, injury or death. Should such an event materialize, we may be exposed to multiple claims for negligence, or other civil and criminal sanctions. While we maintain insurance coverage at levels and for risks that we believe are customary in the goods and logistics industry in India, we cannot assure that there will not be any claims relating to loss or damage to goods, personal injury claims or other operating risks that are not adequately insured.

We cannot assure that the terms of our insurance policies will be adequate to cover any such damage or loss suffered or that such coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim.

Furthermore, any accident or incident involving vehicles operated by our business partners, even if these vehicles are fully insured or we are held not to be liable, could negatively affect our reputation among clients and the public, thereby making it more difficult for us to compete effectively, and could significantly affect the cost and availability of insurance in the future. To the extent that any such uninsured risks materialize, our business, financial condition and results of operations may be materially and adversely affected.

35. *Our success depends heavily upon our Promoters and Key Managerial Personnel for their continuing services, strategic guidance and financial support.*

Our promoters have been the main guiding force behind the growth and business strategy of our Company. They have vast experience of transportation and packing & moving industry and have been instrumental in the consistent growth of our Company's performance. They are actively involved in day to day business administration and marketing of the Company. Our success depends heavily upon our Promoters and Senior Management for their continuing services, strategic guidance and financial support.

Our Company is depending significantly on the expertise, experience, and continued efforts of our Key Managerial Personnel. If one or more members of our Key Managerial Personnel are unable or unwilling to continue in his/her present position, it may be difficult to find a replacement, and business might thereby be adversely affected. Competition for Key Managerial Personnel in our industry is intense and it is possible that our Company may not be able to retain existing Key Managerial Personnel or may fail to attract/ retain new employees at equivalent positions in the future. As such, loss of Key Managerial Personnel could adversely affect our business, results of operations and financial condition. For further details on the key managerial personnel of our Company, please refer to the chapter titled "Our Management" beginning on page no. 107 of this Prospectus.

36. *Disruptions or failures in our information technology systems may affect our operations. Further, our operations rely significantly on our in-house technologies and processes.*

Our business is significantly dependent on the efficient and uninterrupted operation of our information technology infrastructure that connects our various branches and transshipment hubs across India. We are dependent on our inhouse technologies and processes for a number of functions, including financial and operational controls, vehicle maintenance, tracking of consignments.

Our operations are vulnerable to interruption by fire, earthquake, power loss, telecommunications failure, terrorist attacks, internet failures, computer viruses, and other events beyond our control. Any breaches of our information technology systems may require us to incur further expenditure to set up more advanced security systems to prevent any unauthorized access to our networks. In the event of a significant system failure, our business could experience significant disruption which could have a material adverse effect on our business, results of operations and financial condition.

In the event that our information technology systems are unable to handle additional volume for our operations as our business and scope of services grow, our service levels, operating efficiency and future freight volumes may decline.

In addition, we expect customers to continue to demand more sophisticated, fully integrated information systems from their transportation and logistics service providers. If we fail to hire qualified personnel to implement and maintain our information technology systems or fail to upgrade or replace our information technology systems to handle increased volumes, meet the demands of our customers and protect against disruptions of our operations, we may lose orders and customers which could adversely affect our business.

Further, some of our existing technologies and processes in the business may become obsolete, performing less efficiently compared to newer and better technologies and processes in the future. The cost of upgrading or implementing new technologies, upgrading our existing equipment or expanding capacity could be significant and could adversely affect our results of operations.

37. *Employee misconduct or errors could expose us to business risks or losses that could adversely affect our business prospects, results of operations and financial condition.*

Our transportation services and our packing and moving business are manpower oriented and any misconduct or errors made by our drivers, fieldworkers or other employees will significantly affect our relationships with our customers.

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions, penalties and serious harm to our reputation. Such employee misconduct includes breach in security requirements, misappropriation of funds, hiding unauthorized activities, failure to observe our stringent operational standards and processes, and improper use of confidential information.

It is not always possible to detect or deter such misconduct, and the precautions we take to prevent and detect such misconduct may not be effective. In addition, losses caused on account of employee misconduct or misappropriation of petty cash expenses and advances may not be recoverable, which we may result in write-off of such amounts and thereby adversely affecting our results of operations. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions in such case, our reputation, business prospects, results of operations and financial condition could be adversely affected.

38. *If our employees were to unionize or our labour costs were to increase, our results of operations may be adversely affected.*

None of our employees is currently represented by a collective bargaining agreement and we believe that our non unionized operations have advantages over unionized competitors in providing reliable and cost-competitive customer services, including greater efficiency and flexibility.

However, we cannot assure you that our employees will not unionize, or attempt to unionize in the future, that they will not otherwise seek higher wages and enhanced employee benefits. The unionization of our employees could result in an increase in wage expenses and our cost of employee benefits, limit our ability to provide certain services to our customers, cause customers to limit their use of our services due to the increased potential for strikes or other work stoppages and result in increased expenditures in connection with the collective bargaining process, any of which could have a material adverse effect on our business, financial condition and results of operations.

In addition, we enter into contracts with independent contractors to complete specified assignments and these contractors are required to source the labour necessary to complete such assignments. Although we generally do not engage these labourers directly, it is possible under Indian law that we may be held responsible for wage payments to labourers engaged by contractors should the contractors default on wage payments. Any requirement to fund such payments will adversely affect us, our business, financial condition and results of operations.

Further, there is a possibility that the labour costs increase disproportionately due to increase in wage/salary demand. In this event, if we are unable to pass on the increased costs to our customers, our business operations and financial condition may be adversely affected.

39. Demand for our services may decrease during an economic recession which may adversely affect our profitability and financial condition.

The transportation industry historically has experienced cyclical fluctuations in financial results due to economic recession, stagnancy in freight rate movements, downturns in business cycles of our customers, fuel shortages, price increases by carriers, interest rate fluctuations, and other economic factors beyond our control. In such events, the operating expenses are higher, and if we are unable to pass through to our customers the amount of higher transportation costs our gross profits and income from operations may decrease. If economic recession or a downturn in our customers' business cycles causes a reduction in the volume of goods transported by those customers, our operating results could also be adversely affected.

40. We avail loans from various non-banking financial companies for purchase of vehicles owned by us. In the event that we fail to service our debt obligations or comply with the covenants of the loan agreements, the respective lenders could declare us in default under the terms of our borrowings or may increase the maturity of our obligations resulting in adverse effect on business and results of operations.

We have availed loans from various non-banking financial companies for the purchase of vehicles owned by us. Our ability to service our debt obligations will depend entirely on the cash flow generated by our business in the future. In the event that we fail to service our debt obligations or comply with the covenants of the loan agreements, the respective lenders could declare us in default under the terms of our borrowings or may increase the maturity of our obligations. Failure to meet our obligations could have an adverse affect on our business and results of operations and we may not be able to obtain loans n terms favourable to us.

41. Our inability to manage growth could disrupt our business and reduce our profitability.

A principal component of our strategy is to continue to grow by expanding the size and geographical scope of our businesses. This growth strategy will place significant demands on our management, financial and other resources. It will require us to continuously develop and improve our operational, financial and internal controls. Continuous expansion increases the challenges involved in financial management, recruitment, training and retaining high quality human resources, preserving our culture, values and entrepreneurial environment, and developing and improving our internal administrative infrastructure. Any inability on our part to manage such growth could disrupt our business prospects, impact our financial condition and adversely affect our results of operations.

42. Our Promoters and Promoter Group has extended personal guarantees in connection with certain of our debt facilities. There can be no assurance that such personal guarantees will be continued to be provided by our Promoters in the future or can be called at any time, affecting the financial.

Our Promoters and Promoter Group has rendered personal guarantees in connection with certain of our debt facilities. If any of these guarantees are revoked, our lenders may require alternative guarantees or collateral or cancellation of such facilities, entailing repayment of amounts outstanding under such facilities. If we are unable to procure alternative guarantees satisfactory to our lenders, we may need to seek alternative sources of capital, which may not be available to us at commercially reasonable terms or at all, or to agree to more onerous terms under our financing agreements, which may limit our operational flexibility. Accordingly, our business, financial condition, results of operations, cash flows and prospects may be adversely affected by the revocation of all or any of the personal guarantees provided by our Promoters in connection with our Company's borrowings.

43. Our Promoters and Promoter Group will continue to retain majority shareholding in us after the Issue, which will allow them to exercise significant influence over us and potentially create conflicts of interest.

Our Promoter and Promoter Group may beneficially own approximately 72.11% of our post-Issue equity share capital. As a result, the Promoter and the Promoter Group may have the ability to control our business including matters relating to any sale of all or substantially all of our assets, the timing and distribution of dividends and the election or termination of appointment of our officers and directors. This control could delay, defer or prevent a change in control of the Company, impede a merger, consolidation, takeover or other business combination involving the Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of the Company even if it is in the Company's best interest. In addition, for so long as the Promoter and the Promoter Group continues

to exercise significant control over the Company, they may influence the material policies of the Company in a manner that could conflict with the interests of our other shareholders. The Promoter and the Promoter Group may have interests that are adverse to the interests of our other shareholders and may take positions with which our other shareholders do not agree.

- 44. *The rate of interest for the loans obtained by us from the banks is variable and any increase in interest rates may adversely affect our results of operations and financial condition.***

Our Company is susceptible to changes in interest rates and the risks arising there from. Our sanction letters provide for interest at variable rates with a provision for the periodic resetting of interest rates. Further the lenders are entitled to change the applicable rate of interest, which is a combination of a base rate that depends upon the policies of the RBI and a contractually agreed spread, and in the event of an adverse change in our Company's credit risk rating. For further details of interest payable on our borrowings, please refer to the chapter titled "Financial Indebtedness" on page no. 193 of this Prospectus Further, in recent years, the Government of India have taken measures to control inflation, which have included tightening the monetary policy by raising interest rates. As such, any increase in interest rates may have an adverse effect on our business, results of operations, cash flows and financial condition.

- 45. *Our Group Company DRS Logistics Private Limited has not made its annual filings for the Financial Year 2016-17.***

Our Group Company DRS Logistics Private Limited has not made its annual filing for Financial Year ended March 31, 2017. However the company is under process of filing the same with the concerned Registrar of Companies, Telangana at Hyderabad under the applicable provisions of the Companies Act, 2013.

- 46. *However, delay in compliance of annual filing by our group company will not impact our business operations but it may have an impact on our goodwill. In addition to normal remuneration, other benefits and reimbursement of expenses our Directors (including our Promoters) and Key Management Personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company.***

Some of our Directors (including our Promoters) and Key Management Personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company, in addition to normal remuneration, incentives or benefits and reimbursement of expenses. We cannot assure you that our Directors or our Key Management Personnel would always exercise their rights as Shareholders to the benefit and best interest of our Company. As a result, our Directors will continue to exercise significant control over our Company, including being able to control the composition of our board of directors and determine decisions requiring simple or special majority voting, and our other Shareholders may be unable to affect the outcome of such voting. Our Directors may take or block actions with respect to our business, which may conflict with our best interests or the interests of other minority Shareholders, such as actions with respect to future capital raising or acquisitions. We cannot assure you that our Directors will always act to resolve any conflicts of interest in our favour, thereby adversely affecting our business and results of operations and prospects.

- 47. *Our success depends on our ability to maintain costs at low levels, and generate sufficient freight volumes to achieve acceptable profit margins or avoid losses.***

Our business is characterized by high fixed costs, principally due to the ownership of vehicles. These high fixed costs do not vary significantly with variations in freight volumes and a relatively small change in freight volumes or freight rates can have a significant effect on operating and financial results. Our Company seeks to maximize revenue per operating vehicle, such that it optimizes per our cost. However, difficulties with internal processes or other external adverse influences could lead to shortfalls in revenue. As a result, the success of business depends on our ability to successfully control and reduce costs in addition to optimizing freight volumes and revenues. If our Company is unable to succeed at any of these tasks, and may not be able to recover the fixed costs of operations or achieve acceptable operating or net profit margins, our business, results of operations and financial condition could be adversely affected.

- 48. *Our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures and there can be no assurance that we will be able to pay dividends in the future.***

We currently intend to invest our future earnings, if any, to fund our growth. The amount of our future dividend payments, if any, will depend upon our future earnings, financial condition, cash flows, working capital requirements and capital expenditures. Hence, there can be no assurance that we will be able to pay dividends in the future.

- 49. *The requirements of being a public listed company may strain our resources and impose additional requirements.***

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchanges which require us to file unaudited financial results on a half yearly basis. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management's attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and/or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner.

RISK FACTORS RELATED TO EQUITY SHARES

50. *Any further issuance of Equity Shares by Our Company or sales of Equity Shares by any significant shareholders may adversely affect the trading price of the Equity Shares.*

Any future issuance of Equity Shares by our Company could dilute the investors' shareholding. Any such future issuance of Equity Shares or sales of Equity Shares by any of our significant shareholders may also adversely affect the trading price of the Equity Shares, and could impact our ability to raise capital through an offering of securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares.

51. *There is no existing market for our Equity Shares, and we do not know if one will develop. Our stock price may be highly volatile after the Issue and, as a result, you could lose a significant portion or all of your investment.*

There is no guarantee that our Equity Shares will be listed on the Stock Exchanges in a timely manner or at all and any trading closures at the Stock Exchanges may adversely affect the trading price of our Equity Shares. Prior to the Issue, there has not been a public market for the Equity Shares of our Company. Further, we cannot predict the extent to which investor interest will lead to the development of an active trading market on the Stock Exchanges or how liquid that market will become. If an active market does not develop, you may experience difficulty selling the Equity Shares that you purchased. The Issue Price is not indicative of prices that will prevail in the open market following the Issue. Consequently, you may not be able to sell your Equity Shares at prices equal to or greater than the Issue Price. The market price of the Equity Shares on the Stock Exchanges may fluctuate after listing as a result of several factors, including the following:

- Volatility in the Indian and other Global Securities Markets;
- The performance of the Indian and Global Economy;
- Risks relating to our business and industry, including those discussed in this Prospectus;
- Strategic actions by us or our competitors;
- Investor perception of the investment opportunity associated with the Equity Shares and our future performance;
- Adverse media reports about us, our shareholders or Group Companies;
- Future sales of the Equity Shares;
- Variations in our quarterly results of operations;
- Differences between our actual financial and operating results and those expected by investors and analysts;
- Our future expansion plans;
- Perceptions about our future performance or the performance of transport / logistics companies generally;
- Performance of our competitors in the Indian transport / logistics and the perception in the market about investments in the transport / logistics sector;
- Significant developments in the regulation of the transport / logistics industry in our key locations;
- Changes in the estimates of our performance or recommendations by financial analysts;
- Significant developments in India's economic liberalisation and deregulation policies; and
- Significant developments in India's fiscal and environmental regulations. There has been significant volatility in the Indian stock markets in the recent past, and our Equity Share

Price could fluctuate significantly as a result of market volatility. A decrease in the market price of the Equity Shares could cause you to lose some or all of your investment.

52. *You may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.*

Under current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realized on the sale of shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if the securities transaction tax (“STT”) has been paid on the transaction. The STT will be levied on and collected by an Indian stock exchange on which equity shares are sold. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India, if securities transaction tax has been paid on the transaction. Any gain realized on the sale of shares held for more than 36 months to an Indian resident, which are sold other than on a recognized stock exchange and as a result of which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realized on the sale of equity shares held for a period of 36 months or less which are sold other than on a recognized stock exchange and on which no STT has been paid, may be subject to short term capital gains tax at a relatively higher rate as compared to the transaction where STT has been paid in India.

EXTERNAL RISK FACTORS

53. *Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, results of operations, financial condition and prospects.*

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, results of operations, financial condition and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy.

54. *Any changes in the regulatory framework could adversely affect our operations and growth prospects.*

Our Company is subject to various regulations and policies. For details see section titled “Key Industry Regulations and Policies” beginning on page no. 96 of this Prospectus. Our business and prospects could be materially adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that our Company will succeed in obtaining all requisite regulatory approvals in the future for our operations or that compliance issues will not be raised in respect of our operations, either of which could have a material adverse affect on our business, financial condition and results of operations.

55. *Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse affects on our operations and financial performance.*

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities may cause interruption in the business undertaken by us. Our operations and financial results and the market price and liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

56. *Terrorist attacks, civil unrest and other acts of violence or war involving India and other countries could adversely affect the financial markets and our business.*

Terrorist attacks and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. These acts may also result in a loss of business confidence, impede travel and other services and ultimately adversely affect our business. In addition, any deterioration in relations between India and neighbouring countries might result in investor concern about stability in the region, which could adversely affect the price of our Equity Shares.

India has also witnessed civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic and political events in India could have a negative impact on the value of share prices generally as well as the price of our Equity Shares. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse impact on our business and the price of our Equity Shares.

57. *Instability in financial markets could materially and adversely affect our results of operations and financial condition.*

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets.

The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in Nifty, NSE's/ SENSEX, BSE's benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

58. Any downgrading of India's debt rating by a domestic or international rating agency could adversely affect our Company's business.

Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely affect our Company's ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could harm our Company's business and financial performance and ability to obtain financing for capital expenditures.

China, Japan, India, Australia, and Indonesia are the major markets in Asia Pacific region. China is the largest logistics market in the region due to a huge population in the country and the presence of a large manufacturing base.

LOGISTICS SECTOR IN INDIA

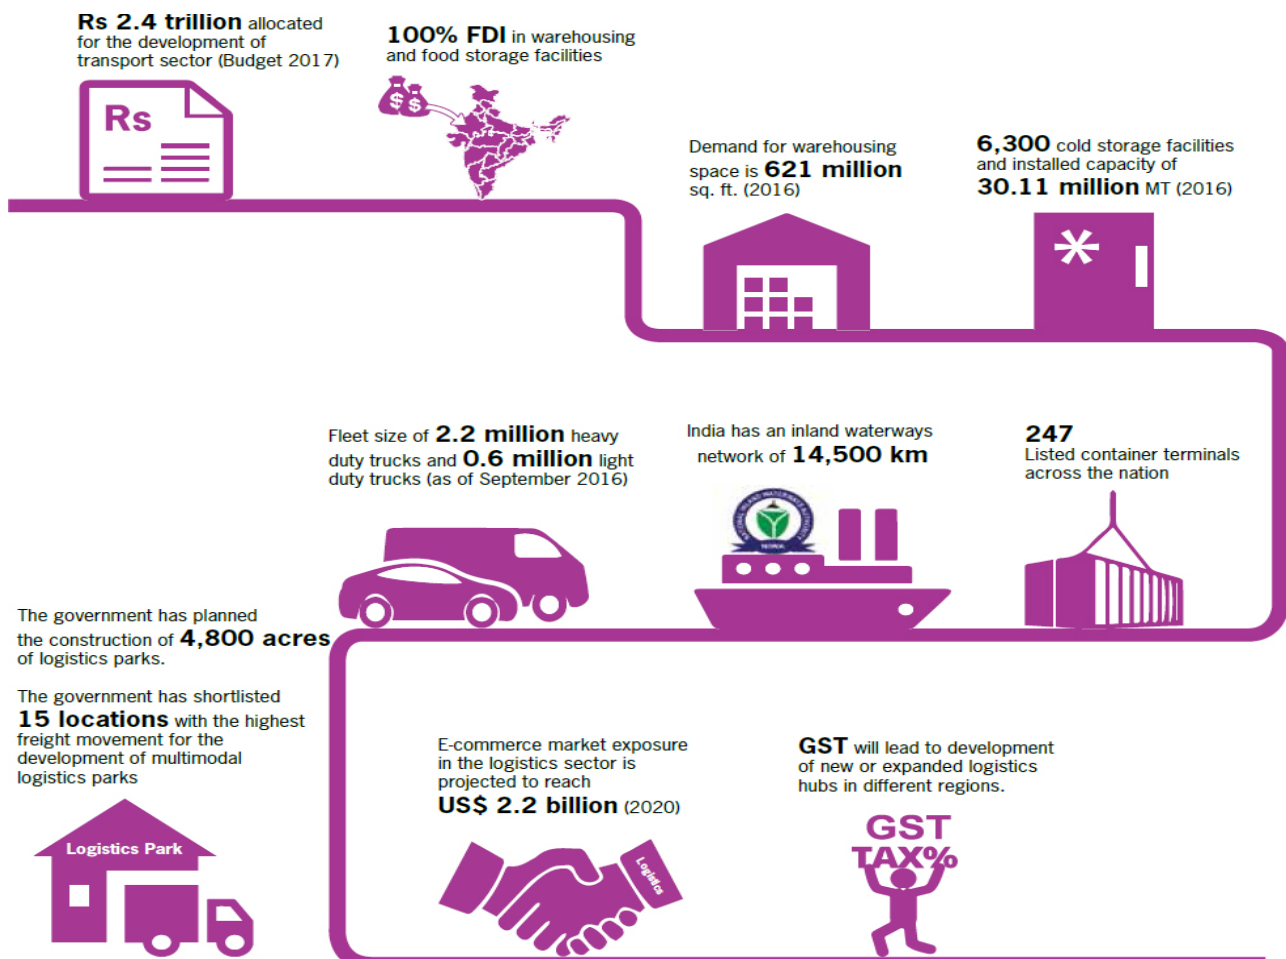

As per the Economic Survey 2017-18, the Indian logistics sector provides livelihood to 22 million-plus people and improving the sector would facilitate a 10% decrease in indirect logistics cost, leading to a growth of 5-8% in exports. Further, the Survey estimates that the worth of Indian logistics market would be around US\$ 215 billion in next two years compared to about US\$ 160 billion currently. The boom in next couple of years is expected largely due to the implementation of Goods and Service Tax (GST).

Relocation Industry over China, India is officially the world's fastest growing major economy in the world. There are clearly global factors that contributed to the economic upswing and more and more people of the millennial generation are on the move 43% of the survey respondents said they'd moved away from their college city or hometown and 44% of respondents live in a more urban city currently than the one they grew up in.

Today, the Indian logistics sector is a sunshine industry and is going through a phase of transformation. Due to the initial efforts of Government of India (GoI), such as Make in India programme and improvements in infrastructure along with the emergence of skilled professionals, the country's position bettered from 54 in 2014 to 35 in 2016 in the World Bank (WB)'s Logistics Performance Index (LPI), in terms of overall logistics performance. In fact, India improved its tally in all the six components of LPI. India also registered an overall 30 points rise in 2017 and stood at 100th position compared to 2016, in the WB's Ease of Doing Business Index (EoDBI).

The Indian logistics sector has gained immense importance over the years and is a major contributor to the GDP. The demand for logistics services in the country has been largely fueled by the consistent growth of Indian economy. India is ahead of other developed countries in terms of logistics spending. As of 2016, the logistics spending in India is high (14% of GDP) as compared to developed countries (8-9% of GDP). According to industry estimates, Indian logistics industry is expected to witness robust growth of 10-12% per annum and reach US\$ 310 billion by 2020 from US\$ 203 billion in 2016. India's growing trade with Asia, Europe and North America is likely to drive the freight forwarding and transportation business. In addition, a huge thrust by the government towards promoting the manufacturing sector and exports is likely to increase the demand for logistics functions during 2015-2020. The Government of India's Foreign Trade Policy (2015-2020) aims to increase the value of trade to US\$ 900 billion by 2020, by aligning its flagship missions such as Make in India, Digital India, and Skills India to promote exports growth.

Market Overview

- India spends around 14.4% of its GDP on logistics and transportation as compared to less than 8% spent by the other developing countries.
- The Indian logistics market is expected to grow at a CAGR of 12.17% by 2020 driven by the growth in the manufacturing, retail, FMCG and e-commerce sectors.
- 3PL logistics market in India is expected to be worth US\$ 301.89 billion by 2020.
- The warehouse market in India is expected to grow at a CAGR of 10%, whereas the freight forwarding market is expected to grow at a CAGR of 12% till 2020.

Key Trends

"The domestic sector is currently in a transformation phase with game-changing trends like implementation of GST, increasing focus by foreign investors across the logistics value chain, growing demand for end-to-end solution providers and emergence of new avenues such as e-commerce, logistics parks, cold chains and new startups.

The GST implementation will also support organised players as it will have three major implications - consolidation of warehousing network and a shift towards a 'hub and spoke' model, higher degree of tax compliance and creation of level playing field between express and traditional transport services providers by virtue of access to input tax credit, ICRA said.

While the key driving factor on the demand side would be the economic recovery, the trend towards outsourcing of non-core activities like logistics, warehousing and associated activities to integrated players is likely to drive the share of the organised segment, it said.

It said the Railways' competitive position is expected to improve on the back of commercialisation of DFCs and augmentation of existing network.

The railways account for 30 per cent of total freight movement in India and are a preferred mode of transportation for long haul and bulky commodities such as coal, iron ore, fertilisers, steel and cement.

"Despite its dominance in transportation of select commodities, it has gradually lost market share over the past few decades due to a confluence of factors, including under-investment in infrastructure, limited private sector participation, better service and reliability offered by road transport segment, and increase in freight charges by railways," it said.

Additionally, the government's other major emphasis is on improving India's transportation mix by developing inland and coastal waterways.

At present, seaways account for a minuscule 6 per cent of total freight movement in India compared to countries like China (30 per cent) and USA (14 per cent) that heavily use waterways.

Given the economic and environmental benefits, the government has chalked an ambitious Sagarmala project that aims at doubling the share of seaways in the transport mix over the next decade by executing multiple projects related to expansion and modernisation of various ports.

The report said with an attempt to improve integrated logistics, the government also plans to develop about 35 strategically located multi-modal logistic parks (MMLPs), close to major manufacturing and consumption centres. These initiatives have significant potential to bring down the logistics costs in the country over the medium term.

"Overall, the Indian logistics industry is at cross-roads, poised for growth on the back of the economic recovery and changing industry dynamics," it said.

Government Initiatives

To alter the country's logistics landscape, GoI has taken a number of decisions. The GST regime is certain to expedite faster conversion of informal logistics setups to formal ones and speed up freight movement at interstate borders due to dismantling of check posts. There is a target to reduce the logistics cost in India from the present 14% of GDP to less than 10% of it, by 2022. A national committee headed by Cabinet Secretary is in place to develop the pan-India roadmap for trade facilitation.

A new Logistics Division in the Department of Commerce has been established to coordinate integrated development of the sector by way of policy changes, improvement in existing procedures, identification of bottlenecks and gaps, and introduction of technology-based interventions. A concerted effort in collaboration with central line ministries and state governments is on to simplify the regulatory processes in domestic and export-import logistics. The Ministry of Commerce and Industry (MoCI) is developing an integrated logistics portal which would serve as a transactional e-marketplace by connecting buyers, logistics service providers and the relevant government agencies such as customs, port community systems, port terminals, shipping lines, railways, etc. Once functional, it would reduce delays and facilitate a transparent, informative and convenient trading system. Recently the Ministry also launched a new Logistics

Ease Across Different States Index to rank states for the support they provide to improve logistics infrastructure within their respective jurisdictions.

Challenges

The dilemma is that as world population increases and world-wide distribution chains become more sophisticated, the corresponding increase in the use of packaging has the potential of becoming as much a problem as a solution. In some parts of the world, some poorly informed people would prefer a significant reduction, and in some cases, elimination of packaging. This regression is based on a lack of understanding of the overall impact that packaging has upon Society.

Actually, packaging has tremendous resource-saving potential. Clearly, over-packaging consumes too many resources. Under-packaging allows for damage and spoilage of contents, also wasting resources. The goal is “right size” and “right strength” packaging. It is the result of a holistic view that balances the proper use of resources against the environmental, social, and financial needs of packaging users and Society.

The facts are clear. The production of packaging materials consumes both natural and human resources. The application of those materials further uses more valuable resources. Finally, the disposal of packaging materials into landfills, incinerators, and, inappropriately, on the sides of countless highways and roads, waterways, seas and forests as litter, also requires the utilization of more valuable resources, most of which could have been used again, or differently.

The other challenges hindering its growth include high cost, underdeveloped material handling infrastructure, fragmented warehousing, presence of multiple regulatory and policy making entities, lack of seamless movement of goods across modes, and poor integration with modern information technology. These challenges, particularly the ones pertaining to procedural complexities, redundant documentations and involvement of several agencies at our ports and borders, severely dent our performance in international trade, resulting into about 70% of the delays.

(Source: <http://niti.gov.in/content/indian-logistics-sector-path-transformation>)

Road Ahead

By recognizing the importance of the sector, a new logistics division has been created in the Department of Commerce to develop and coordinate integrated development of the industry, improvement in existing procedures, identification of bottlenecks and gaps, and introduction of technology-based interventions in this sector, the survey said.

Improving logistics sector has huge implication on exports and it is estimated that a 10 per cent decrease in indirect logistics cost can increase 5-8 per cent of exports.

Apart from increasing trade, better performance in logistics will augment programmes like Make in India, and also enable India to become an important part of the global supply chain.

Global Scenario

The world economy has strengthened as lingering fragilities related to the global financial crisis subside. In 2017, global economic growth reached 3 per cent—the highest growth rate since 2011—and growth is expected to remain steady for the coming year. The improved global economic situation provides an opportunity for countries to focus policy towards longer-term issues such as low carbon economic growth, reducing inequalities, economic diversification and eliminating deep-rooted barriers that hinder development.

(Source: <https://www.un.org/development/desa/dpad/publication/world-economic-situation-and-prospects-2018/>)

The stronger momentum experienced in 2017 is expected to carry into 2018 and 2019, with global growth revised up to 3.9 percent for both years (0.2 percentage point higher relative to the fall forecasts). For the two-year forecast horizon, the upward revisions to the global outlook result mainly from advanced economies, where growth is now expected to exceed 2 percent in 2018 and 2019. This forecast reflects the expectation that favorable global financial conditions and strong sentiment will help maintain the recent acceleration in demand, especially in investment, with a noticeable impact on growth in economies with large exports. In addition, the U.S. tax reform and associated fiscal stimulus are expected to temporarily raise U.S. growth, with favorable demand spillovers for U.S. trading partners—especially Canada and Mexico—during this period. The expected global macroeconomic effects account for around one-half of the cumulative upward revision to the global growth forecast for 2018 and 2019, with a range of uncertainty around this baseline projection.

The growth forecast for the United States has been revised up given stronger than expected activity in 2017, higher projected external demand, and the expected macroeconomic impact of the tax reform, in particular the reduction in corporate tax rates and the temporary allowance for full expensing of investment. The forecast assumes that the decline in tax revenues will not be offset by spending cuts in the near term. The tax reform is therefore anticipated to stimulate near-term activity in the United States. As a by-product, stronger domestic demand is projected to increase imports and widen the current account deficit. Overall, the policy changes are projected to add to growth through 2020, so that U.S. real GDP is 1.2 percent higher by 2020 than in a projection without the tax policy changes. The U.S. growth forecast has been raised from 2.3 percent to 2.7 percent in 2018, and from 1.9 percent to 2.5 percent in 2019. In light of the increased fiscal deficit, which will require fiscal adjustment down the road, and the temporary nature of some provisions, growth is expected to be lower than in previous forecasts for a few years from 2022 onward, offsetting some of the earlier growth gains. The inflation response to higher domestic demand is expected to be muted given the low sensitivity of core price pressures to changes in slack in recent years and a somewhat faster projected pace of U.S. Federal Reserve policy rate hikes than in the fall, with a modest decompression of term premiums and no sizable U.S. dollar appreciation. According to the U.S. Congressional Joint Committee on Taxation, the tax code overhaul is projected to reduce the average tax rate on upper income U.S. households relative to those in the middle and lower segments, especially over the medium term (when some provisions benefiting lower- and middle-income taxpayers expire).

Growth rates for many of the euro area economies have been marked up, especially for Germany, Italy, and the Netherlands, reflecting the stronger momentum in domestic demand and higher external demand. Growth in Spain, which has been well above potential, has been marked down slightly for 2018, reflecting the effects of increased political uncertainty on confidence and demand.

The growth forecast for 2018 and 2019 has also been revised up for other advanced economies, reflecting in particular stronger growth in advanced Asian economies, which are especially sensitive to the outlook for global trade and investment. The growth forecast for Japan has been revised up for 2018 and 2019, reflecting upward revisions to external demand, the supplementary budget for 2018, and carryover from stronger-than-expected recent activity.

The aggregate growth forecast for the emerging markets and developing economies for 2018 and 2019 is unchanged, with marked differences in the outlook across regions. Emerging and developing Asia will grow at around 6.5 percent over 2018–19, broadly the same pace as in 2017. The region continues to account for over half of world growth. Growth is expected to moderate gradually in China (though with a slight upward revision to the forecast for 2018 and 2019 relative to the fall forecasts, reflecting stronger external demand), pick up in India, and remain broadly stable in the ASEAN-5 region.

Risks

Risks to the outlook are broadly balanced in the near term, but—as in the October 2017 WEO—remain skewed to the downside over the medium term. One notable threat to growth is a tightening of global financing terms from their current easy settings, either in the near term or later.

In the near term, the global economy is likely to maintain its momentum absent a correction in financial markets—which have seen a sustained run-up in asset prices and very low volatility, seemingly unperturbed by policy or political uncertainty in recent months. Such momentum could even surprise on the upside in the near term if confidence in the global outlook and easy financial conditions continue to reinforce each other.

The reaction of longer-term bond yields and the U.S. dollar to the change in U.S. tax policy appears to have been limited so far, and markets currently anticipate a more gradual pace of monetary policy tightening than incorporated into the WEO baseline. A financial market correction could be triggered, for example, by signs of firmer inflation in the United States, where the boost to demand will exert downward pressure on the already very low unemployment rate. Higher inflation pressure, together with faster Fed policy rate tightening than anticipated in the baseline, could contribute to a larger decompression of term premiums in the United States, a stronger U.S. dollar, and lower equity prices. The tightening of global financial conditions would have implications for global asset prices and capital flows, leaving economies with high gross debt refinancing needs and unhedged dollar liabilities particularly exposed to financial distress.

Also on the downside, the response of U.S. investment to tax policy changes could be more modest than envisaged in the baseline, with attendant repercussions on the strength of external demand for the main U.S. trading partners. Over the medium term, a potential buildup of vulnerabilities if financial conditions remain easy, the possible adoption of inward-looking policies, and noneconomic factors pose notable downside risks.

Buildup of financial vulnerabilities. If financial conditions remain easy into the medium term, with a protracted period of very low interest rates and low expected volatility in asset prices, vulnerabilities could accumulate as yield-seeking investors increase exposure to lower-rated corporate and sovereign borrowers and less credit-worthy households. As noted in the October 2017 *Global Financial Stability Report*, the share of companies with low investment-grade ratings in advanced economy bond indices has increased significantly in recent years. Non-financial corporate debt has grown rapidly in some emerging markets, calling for a policy response. The Chinese authorities have made a welcome start by recently tightening the regulation of non-bank intermediation. Credit risks on these exposures may be hidden while near-term global growth momentum is maintained and refinancing needs remain low. The absence of near-term warning flags, in turn, may reinforce yield-seeking behavior and amplify the buildup of financial vulnerabilities that come to the fore over the medium term.

Inward-looking policies. Important long-standing commercial agreements, such as NAFTA and the economic arrangements between the United Kingdom and rest of the European Union, are under renegotiation. An increase in trade barriers and regulatory realignments, in the context of these negotiations or elsewhere, would weigh on global investment and reduce production efficiency, exerting a drag on potential growth in advanced, emerging market, and developing economies. A failure to make growth more inclusive and the widening of external imbalances in some countries, including the United States, could increase pressures for inward-looking policies.

Noneconomic factors. The medium-term global outlook is also clouded by geopolitical tensions, notably in East Asia and the Middle East. Political uncertainty also gives rise to reform implementation risks or the possibility of reoriented policy agendas, including in the context of upcoming elections in several countries (such as Brazil, Colombia, Italy, and Mexico). Recent extreme weather developments—hurricanes in the Atlantic, drought in sub-Saharan Africa and Australia—point to the risk of recurrent, potent climate events that impose devastating humanitarian costs and economic losses on the affected regions. They may also add to migration flows that could further destabilize already fragile recipient countries.

Policies

Two common policy objectives tie advanced, emerging, and developing economies together. First, the need to raise potential output growth—through structural reforms to lift productivity and, especially in advanced economies with aging populations, enhance labor force participation rates—while making sure that the gains from growth are shared widely. Second, the imperative to increase resilience, including through proactive financial regulation and, where needed, balance sheet repair and strengthening fiscal buffers. Action is particularly important in a low-interest-rate, low-volatility environment with potential for disruptive portfolio adjustments and capital flow reversals. The current cyclical upswing provides a unique opportunity for structural and governance reforms.

Against a backdrop of common priorities, the optimal policy mix differs across countries depending on cyclical considerations and available policy space:

In *advanced economies* where output is close to potential, still-muted wage and price pressures call for a cautious and data-dependent monetary policy normalization path. However, where unemployment is low and projected to decline further, such as in the United States, a faster pace of policy normalization may be required if inflation were to pick up more than currently anticipated. In advanced economies where output gaps persist and inflation remains below the central bank target, continued monetary accommodation is desirable. Fiscal policy in both cases should focus on medium-term objectives—including public investment to boost potential output and initiatives to raise labor force participation rates where gaps exist—while ensuring that public debt dynamics are sustainable and excessive external imbalances are reduced. Where fiscal consolidation is needed, its pace should be calibrated to avoid sharp drags on growth, while orienting policy toward boosting the quality of public health and education, and protecting the vulnerable, including those that may be adversely affected by structural transformation.

The policy challenges for *low-income countries* are particularly complex, as they involve multiple, sometimes conflicting goals. These include supporting near-term activity; diversifying their economies and lifting potential output to maintain progress toward their Sustainable Development Goals; building buffers to enhance resilience, especially in commodity-dependent economies grappling with a subdued outlook for commodity prices; and tackling high and rising debt levels in many cases. Policy initiatives should continue to focus on broadening the tax base, mobilizing revenue, improving debt management, reducing poorly targeted subsidies, and channeling spending into areas that lift potential growth and improve the livelihoods of all (infrastructure, health, and education). Efforts to strengthen macroprudential frameworks and greater exchange rate flexibility would improve resource allocation, reduce vulnerabilities, and boost resilience.

LOGISTICS SECTOR IN INDIA

As per the Economic Survey 2017-18, the Indian logistics sector provides livelihood to 22 million-plus people and improving the sector would facilitate a 10% decrease in indirect logistics cost, leading to a growth of 5-8% in exports. Further, the Survey estimates that the worth of Indian logistics market would be around US\$ 215 billion in next two years compared to about US\$ 160 billion currently. The boom in next couple of years is expected largely due to the implementation of Goods and Service Tax (GST).

Relocation Industry over China, India is officially the world's fastest growing major economy in the world. There are clearly global factors that contributed to the economic upswing and more and more people of the millennial generation are on the move 43% of the survey respondents said they'd moved away from their college city or hometown and 44% of respondents live in a more urban city currently than the one they grew up in.

Today, the Indian logistics sector is a sunshine industry and is going through a phase of transformation. Due to the initial efforts of Government of India (GoI), such as Make in India programme and improvements in infrastructure along with the emergence of skilled professionals, the country's position bettered from 54 in 2014 to 35 in 2016 in the World Bank (WB)'s Logistics Performance Index (LPI), in terms of overall logistics performance. In fact, India improved its tally in all the six components of LPI. India also registered an overall 30 points rise in 2017 and stood at 100th position compared to 2016, in the WB's Ease of Doing Business Index (EoDBI).

The Indian logistics sector has gained immense importance over the years and is a major contributor to the GDP. The demand for logistics services in the country has been largely fueled by the consistent growth of Indian economy. India is ahead of other developed countries in terms of logistics spending. As of 2016, the logistics spending in India is high (14% of GDP) as compared to developed countries (8-9% of GDP). According to industry estimates, Indian logistics industry is expected to witness robust growth of 10-12% per annum and reach US\$ 310 billion by 2020 from US\$ 203 billion in 2016. India's growing trade with Asia, Europe and North America is likely to drive the freight forwarding and transportation business. In addition, a huge thrust by the government towards promoting the manufacturing sector and exports is likely to increase the demand for logistics functions during 2015-2020. The Government of India's Foreign Trade Policy (2015-2020) aims to increase the value of trade to US\$ 900 billion by 2020, by aligning its flagship missions such as Make in India, Digital India, and Skills India to promote exports growth.

Market Overview

- India spends around 14.4% of its GDP on logistics and transportation as compared to less than 8% spent by the other developing countries.
- The Indian logistics market is expected to grow at a CAGR of 12.17% by 2020 driven by the growth in the manufacturing, retail, FMCG and e-commerce sectors.
- 3PL logistics market in India is expected to be worth US\$ 301.89 billion by 2020.
- The warehouse market in India is expected to grow at a CAGR of 10%, whereas the freight forwarding market is expected to grow at a CAGR of 12% till 2020.

Key Trends

"The domestic sector is currently in a transformation phase with game-changing trends like implementation of GST, increasing focus by foreign investors across the logistics value chain, growing demand for end-to-end solution providers and emergence of new avenues such as e-commerce, logistics parks, cold chains and new startups.

The GST implementation will also support organised players as it will have three major implications - consolidation of warehousing network and a shift towards a 'hub and spoke' model, higher degree of tax compliance and creation of level playing field between express and traditional transport services providers by virtue of access to input tax credit, ICRA said.

While the key driving factor on the demand side would be the economic recovery, the trend towards outsourcing of non-core activities like logistics, warehousing and associated activities to integrated players is likely to drive the share of the organised segment, it said.

It said the Railways' competitive position is expected to improve on the back of commercialisation of DFCs and augmentation of existing network.

The railways account for 30 per cent of total freight movement in India and are a preferred mode of transportation for long haul and bulky commodities such as coal, iron ore, fertilisers, steel and cement.

"Despite its dominance in transportation of select commodities, it has gradually lost market share over the past few decades due to a confluence of factors, including under- investment in infrastructure, limited private sector participation, better service and reliability offered by road transport segment, and increase in freight charges by railways," it said.

Additionally, the government's other major emphasis is on improving India's transportation mix by developing inland and coastal waterways.

At present, seaways account for a minuscule 6 per cent of total freight movement in India compared to countries like China (30 per cent) and USA (14 per cent) that heavily use waterways.

Given the economic and environmental benefits, the government has chalked an ambitious Sagarmala project that aims at doubling the share of seaways in the transport mix over the next decade by executing multiple projects related to expansion and modernisation of various ports.

The report said with an attempt to improve integrated logistics, the government also plans to develop about 35 strategically located multi-modal logistic parks (MMLPs), close to major manufacturing and consumption centres. These initiatives have significant potential to bring down the logistics costs in the country over the medium term.

"Overall, the Indian logistics industry is at cross- roads, poised for growth on the back of the economic recovery and changing industry dynamics," it said.

Government Initiatives

To alter the country's logistics landscape, GoI has taken a number of decisions. The GST regime is certain to expedite faster conversion of informal logistics setups to formal ones and speed up freight movement at interstate borders due to dismantling of check posts. There is a target to reduce the logistics cost in India from the present 14% of GDP to less than 10% of it, by 2022. A national committee headed by Cabinet Secretary is in place to develop the pan-India roadmap for trade facilitation.

A new Logistics Division in the Department of Commerce has been established to coordinate integrated development of the sector by way of policy changes, improvement in existing procedures, identification of bottlenecks and gaps, and introduction of technology-based interventions. A concerted effort in collaboration with central line ministries and state governments is on to simplify the regulatory processes in domestic and export-import logistics. The Ministry of Commerce and Industry (MoCI) is developing an integrated logistics portal which would serve as a transactional e-marketplace by connecting buyers, logistics service providers and the relevant government agencies such as customs, port community systems, port terminals, shipping lines, railways, etc. Once functional, it would reduce delays and facilitate a transparent, informative and convenient trading system. Recently the Ministry also launched a new Logistics Ease Across Different States Index to rank states for the support they provide to improve logistics infrastructure within their respective jurisdictions.

Challenges

The dilemma is that as world population increases and world-wide distribution chains become more sophisticated, the corresponding increase in the use of packaging has the potential of becoming as much a problem as a solution. In some parts of the world, some poorly informed people would prefer a significant reduction, and in some cases, elimination of packaging. This regression is based on a lack of understanding of the overall impact that packaging has upon Society.

Actually, packaging has tremendous resource-saving potential. Clearly, over-packaging consumes too many resources. Under-packaging allows for damage and spoilage of contents, also wasting resources. The goal is "right size" and "right strength" packaging. It is the result of a holistic view that balances the proper use of resources against the environmental, social, and financial needs of packaging users and Society.

The facts are clear. The production of packaging materials consumes both natural and human resources. The application of those materials further uses more valuable resources. Finally, the disposal of packaging materials into landfills, incinerators, and, inappropriately, on the sides of countless highways and roads, waterways, seas and forests

as litter, also requires the utilization of more valuable resources, most of which could have been used again, or differently.

(Source: www.worldpackaging.org/i4a/doclibrary/getfile.cfm?doc_id=1)

The other challenges hindering its growth include high cost, underdeveloped material handling infrastructure, fragmented warehousing, presence of multiple regulatory and policy making entities, lack of seamless movement of goods across modes, and poor integration with modern information technology. These challenges, particularly the ones pertaining to procedural complexities, redundant documentations and involvement of several agencies at our ports and borders, severely dent our performance in international trade, resulting into about 70% of the delays.

(Source: <http://niti.gov.in/content/indian-logistics-sector-path-transformation>)

Road Ahead

By recognizing the importance of the sector, a new logistics division has been created in the Department of Commerce to develop and coordinate integrated development of the industry, improvement in existing procedures, identification of bottlenecks and gaps, and introduction of technology-based interventions in this sector, the survey said.

Improving logistics sector has huge implication on exports and it is estimated that a 10 per cent decrease in indirect logistics cost can increase 5-8 per cent of exports.

Apart from increasing trade, better performance in logistics will augment programmes like Make in India, and also enable India to become an important part of the global supply chain.

COMPETITION

The surface transport industry in which we operate is unorganized and fragmented with many small and medium-sized companies. Logistics being a global industry, we face competition from various domestic and international players. We compete with other service provider on the basis of service quality, price and reliability. While these factors are key parameters in client's decisions matrix in availing service, we try to offer the best quality service at economical price.

Although a number of consolidators compete with us on a regional basis, only a limited number of consolidators compete with us in all of our geographic markets. We believe that the scale and scope of our operations allow us to meet our customers' requirements better than the smaller consolidators. Due to industry's fragmented nature, there is no authentic data available to our Company on total industry size and markets share of our Company vis-a-vis the competitors.

The packers and movers industry in which we operate is also unorganized sector and fragmented with small players. There are no major players in the market having scale of operations like ours, packing material and carriers like ours. Thus we believe that our large network and comprehensive service offering as well as our established reputation enables us to compete effectively in the market.

Act.**”). The T.P. Act establishes the general principles relating to the transfer of property, including among other things, identifying the categories of property that are capable of being transferred, the persons competent to transfer property, the validity of restrictions and conditions imposed on the transfer and the creation of contingent and vested interest in the property. Transfer of property is subject to stamping and registration under the specific statutes enacted for the purposes which have been dealt with hereinafter.

The T.P. Act recognizes, among others, the following forms in which an interest in an immovable property may be transferred:

- **Sale:** The transfer of ownership in property for a price, paid or promised to be paid.
- **Mortgage:** The transfer of an interest in property for the purpose of securing the payment of a loan, existing or future debt, or performance of an engagement which gives rise to a pecuniary liability. The T.P. Act recognises several forms of mortgages over a property.
- **Charges:** Transactions including the creation of security over property for payment of money to another which are not classifiable as a mortgage. Charges can be created either by operation of law, e.g. decree of the court attaching to specified immovable property, or by an act of the parties.

It provides a framework of rules and regulations that govern formation and performance of contract. The contracting parties themselves decide the rights and duties of parties and terms of agreement.

4. The Specific Relief Act, 1963:

The Specific Relief Act, 1963 (“**Specific Relief Act**”) is complimentary to the provisions of the Contract Act and the Transfer of Property Act, as the Act applies both to movable property and immovable property. The Indian government’s favorable policy regime and robust business environment have ensured that foreign capital keeps flowing into the country. The government has taken many initiatives in recent years such as relaxing FDI norms across sectors such as defense, PSU oil refineries, telecom, power exchanges, and stock exchanges, among others. According to Department of Industrial Policy and Promotion (DIPP), the total FDI investments in India during 2017-18 stood at US\$ 44.86 billion, indicating that government's effort to improve ease of doing business and relaxation in FDI norms is yielding results.

The weighted average number of equity shares outstanding during the period is adjusted for events of bonus issue and share split.

For the purpose of calculating diluted earnings/(loss) per share, the net profit/(loss) for the period/year attributable to equity shareholders and the weighted average number of shares outstanding during the period/ year are adjusted for the effects of all dilutive potential equity shares except where the results will be anti-dilutive. The dilutive potential equity shares are deemed converted as of the beginning of the period, unless they have been issued at a later date.

L. Taxes on Income:

Income tax expense comprises current tax expense and the net change in the deferred tax asset or liability during the year. Current and deferred taxes are recognized in statement of profit and loss.

Current Tax:

Provision for current income tax is made for the tax liability payable on taxable income after considering tax allowances, deductions and exemptions determined in accordance with the applicable tax rates and the prevailing tax laws.

Minimum Alternate Tax credit is recognized as an asset only when and to the extent there is convincing evidence that the company will pay normal income tax during the specified period. Such asset is reviewed at each Balance Sheet date and the carrying amount of the MAT credit asset is written down to the extent there is no longer a convincing evidence to the effect that the Company will pay normal income tax during the specified period.

Deferred tax:

Deferred tax is recognized on timing differences; being the difference between taxable income and accounting income that originate in one period and are capable of reversal in one or more subsequent periods. The deferred tax is accounted for using the tax rates and laws that have been substantively enacted as of the balance sheet date.

Deferred tax assets/ liabilities in respect of unabsorbed depreciation and carry forward of losses are recognized only if there is virtual certainty that such deferred tax Asset/ liability can be realized against future taxable profits.

M. Impairment of Assets :

The Company assesses at each reporting date as to whether there is any indication that an asset (tangible and intangible) may be impaired. An asset is treated as impaired, when the carrying cost of the asset exceeds its recoverable amount. Recoverable amount is higher of an asset's or cash generating unit's net selling price and its value in use. Value in use is the present value of estimated future cash flows expected to arise from the continuing use of an asset and from its disposal at the end of its useful life.

An impairment loss is charged to Profit and Loss Account in the year in which an asset is identified as impaired. The impairment loss recognised in prior accounting period is reversed if there has been a change in the estimate of recoverable amount.

N. Provisions, Contingent Liabilities and Contingent Assets:

A provision is recognized if, as a result of a past event, the Company has a present legal obligation that is reasonably estimable, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by the best estimate of the outflow of economic benefits required to settle the obligation at the reporting date. Where no reliable estimate can be made, a disclosure is made as contingent liability. A disclosure for a contingent liability is also made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. Where there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

COMPETITION

The surface transport industry in which we operate is unorganized and fragmented with many small and medium-sized companies. Logistics being a global industry, we face competition from various domestic and international players. We compete with other service provider on the basis of service quality, price and reliability. While these factors are key parameters in client's decisions matrix in availing service, we try to offer the best quality service at economical price.

Although a number of consolidators compete with us on a regional basis, only a limited number of consolidators compete with us in all of our geographic markets. We believe that the scale and scope of our operations allow us to meet our customers' requirements better than the smaller consolidators. Due to industry's fragmented nature, there is no authentic data available to our Company on total industry size and markets share of our Company vis-a-vis the competitors.

The packers and movers industry in which we operate is also unorganized sector and fragmented with small players. There are no major players in the market having scale of operations like ours, packing material and carriers like ours. Thus we believe that our large network and comprehensive service offering as well as our established reputation enables us to compete effectively in the market.

Significant Developments after March 31, 2018 that may affect our Future Results of Operations

The Directors confirm that there have been no events or circumstances since the date of the last financial statements as disclosed in the Prospectus which materially or adversely affect or is likely to affect the profitability of our Company, or the value of our assets, or our ability to pay liabilities within next twelve months.

Except as otherwise stated in this Prospectus and the Risk Factors given in the Prospectus, the following important factors could cause actual results to differ materially from the expectations include, among others.

Revenue Generation

We aim at increasing in operational output through continuous process improvement, Quality Assurance (QA) and QA activities, customer service, consistent quality and technology development.

Our ability to successfully implement its strategy and its growth and expansion plans

Our revenue and our business operations have grown in recent years. Although we plan to continue to expand our scale of operations, we may not be able to sustain these rates of growth in future periods due to a number of factors, including, among others, our execution capability, our ability to maintain customer satisfaction, macroeconomic factors beyond our control such as decline in global economic conditions, competition within India from players in the organized and unorganized segments, the greater difficulty of growing at sustained rates from a larger revenue base, our inability to control our expenses and the availability of resources for our growth. There can be no assurance that we will not suffer from capital constraints, operational difficulties or difficulties in expanding existing business operations. Our development and expansion strategies will require substantial managerial efforts and skills and the incurrence of additional expenditures and may subject us to new or increased risks. We may not be able to efficiently or effectively implement our growth strategies or manage the growth of our operations, and any failure to do so may limit future growth and have an adverse effect on our business.

Market Conditions and Demand for our Services

Our results of operations depend on the continued existence, success and growth of, and demand for, our various services. Developments in the global and Indian economy influence the decisions of enterprises to determine their pricing strategy, market based factors and quality standards thereby affecting the demand for our services.

5.6 BASIS OF ALLOCATION

- a) The SEBI ICDR Regulations, 2009 specify the allocation or Allotment that may be made to various categories of Applicants in an Issue depending on compliance with the eligibility conditions. Certain details pertaining to the percentage of Issue size available for allocation to each category is disclosed overleaf of the Bid cum Application Form and in the Prospectus. For details in relation to allocation, the Applicant may refer to the Prospectus.
- b) Under-subscription in any category (except QIB Category) is allowed to be met with spillover from any other category or combination of categories at the discretion of the Issuer and in consultation with the BRLMs and the Designated Stock Exchange and in accordance with the SEBI ICDR Regulations, 2009. Unsubscribed portion in QIB Category is not available for subscription to other categories.
- c) In case of under subscription in the Issue, spill-over to the extent of such under-subscription may be permitted from the Reserved Portion to the Issue. For allocation in the event of an under-subscription applicable to the Issuer, Applicants may refer to the Prospectus.
- d) Illustration of the Book Building and Price Discovery Process Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors.

Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹ 20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table

below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer in consultation with the BRLMs, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

e) Alternate Method of Book Building

In case of FPOs, Issuers may opt for an alternate method of Book Building in which only the Floor Price is specified for the purposes of bidding (“**Alternate Book Building Process**”).

The Issuer may specify the Floor Price in the Prospectus or advertise the Floor Price at least one Working Day prior to the Bid/ Issue Opening Date. QIBs may Bid at a price higher than the Floor Price and the Allotment to the QIBs is made on a price priority basis. The Bidder with the highest Bid Amount is allotted the number of Equity Shares Bid for and then the second highest Bidder is Allotted Equity Shares and this process continues until all the Equity Shares have been allotted. RIIs, NIIs and Employees are Allotted Equity Shares at the Floor Price and Allotment to these categories of Bidders is made proportionately. If the number of Equity Shares Bid for at a price is more than available quantity then the Allotment may be done on a proportionate basis. Further, the Issuer may place a cap either in terms of number of specified securities or percentage of issued capital of the Issuer that may be Allotted to a single Bidder, decide whether a Bidder be allowed to revise the bid upwards or downwards in terms of price and/or quantity and also decide whether a Bidder be allowed single or multiple bids.

SECTION 6: ISSUE PROCEDURE IN FIXED PRICE ISSUE

Applicants may note that there is no Bid cum Application Form in a Fixed Price Issue. As the Issue Price is mentioned in the Fixed Price Issue therefore on filing of the Prospectus with the RoC, the Application so submitted is considered as the Application Form.

Applicants may only use the specified Application Form for the purpose of making an Application in terms of the Prospectus which may be submitted through the Designated Intermediary.

Applicants may submit an Application Form either in physical form to the any of the Designated Intermediaries or in the electronic form to the SCSB or the Designated Branches of the SCSBs authorising blocking of funds that are available in the bank account specified in the Application Form only (“ASBA Account”). The Application Form is also made available on the websites of the Stock Exchanges at least one day prior to the Bid/Issue Opening Date.

In a fixed price Issue, allocation in the net issue to the public category is made as follows: minimum fifty per cent to Retail Individual Investors; and remaining to (i) individual investors other than Retail Individual Investors; and (ii) other Applicants including corporate bodies or institutions, irrespective of the number of specified securities applied for. The unsubscribed portion in either of the categories specified above may be allocated to the Applicants in the other category.

For details of instructions in relation to the Application Form, Applicants may refer to the relevant section of the GID.

SECTION 7: ALLOTMENT PROCEDURE AND BASIS OF ALLOTMENT

The Allotment of Equity Shares to Applicants other than Retail Individual Investors and Anchor Investors may be on proportionate basis. For Basis of Allotment to Anchor Investors, Applicants may refer to Prospectus. No Retail Individual Investor will be Allotted less than the minimum Bid Lot subject to availability of shares in Retail Individual Investor Category and the remaining available shares, if any will be Allotted on a proportionate basis. The Issuer is

required to receive a minimum subscription of 90% of the Issue (excluding any Offer for Sale of specified securities). However, in case the Issue is in the nature of Offer for Sale only, then minimum subscription may not be applicable.

7.1 ALLOTMENT TO RIIs

Bids received from the RIIs at or above the Issue Price may be grouped together to determine the total demand under this category. If the aggregate demand in this category is less than or equal to the Retail Category at or above the Issue Price, full Allotment may be made to the RIIs to the extent of the valid Bids. If the aggregate demand in this category is greater than the allocation to in the Retail Category at or above the Issue Price, then the maximum number of RIIs who can be Allotted the minimum Bid Lot will be computed by dividing the total number of Equity Shares available for Allotment to RIIs by the minimum Bid Lot (“**Maximum RII Allottees**”). The Allotment to the RIIs will then be made in the following manner:

- a) In the event the number of RIIs who have submitted valid Bids in the Issue is equal to or less than Maximum RII Allottees, (i) all such RIIs shall be Allotted the minimum Bid Lot; and (ii) the balance available Equity Shares, if any, remaining in the Retail Category shall be Allotted on a proportionate basis to the RIIs who have received Allotment as per (i) above for the balance demand of the Equity Shares Bid by them (i.e. who have Bid for more than the minimum Bid Lot).
- b) In the event the number of RIIs who have submitted valid Bids in the Issue is more than Maximum RII Allottees, the RIIs (in that category) who will then be Allotted minimum Bid Lot shall be determined on the basis of draw of lots.

7.2 ALLOTMENT TO NIIs

Bids received from NIIs at or above the Issue Price may be grouped together to determine the total demand under this category. The Allotment to all successful NIIs may be made at or above the Issue Price. If the aggregate demand in this category is less than or equal to the Non-Institutional Category at or above the Issue Price, full Allotment may be made to NIIs to the extent of their demand. In case the aggregate demand in this category is greater than the Non-Institutional Category at or above the Issue Price, Allotment may be made on a proportionate basis up to a minimum of the Non-Institutional Category.

7.3 ALLOTMENT TO QIBs

For the Basis of Allotment to Anchor Investors, Applicants may refer to the SEBI ICDR Regulations, 2009 or Prospectus. Bids received from QIBs Bidding in the QIB Category (net of Anchor Portion) at or above the Issue Price may be grouped together to determine the total demand under this category. The QIB Category may be available for Allotment to QIBs who have Bid at a price that is equal to or greater than the Issue Price. Allotment may be undertaken in the following manner:

- a) In the first instance allocation to Mutual Funds for up to 5% of the QIB Category may be determined as follows: (i) In the event that Bids by Mutual Fund exceeds 5% of the QIB Category, allocation to Mutual Funds may be done on a proportionate basis for up to 5% of the QIB Category; (ii) In the event that the aggregate demand from Mutual Funds is less than 5% of the QIB Category then all Mutual Funds may get full Allotment to the extent of valid Bids received above the Issue Price; and (iii) Equity Shares remaining unsubscribed, if any and not allocated to Mutual Funds may be available for Allotment to all QIBs as set out at paragraph 7.4(b) below;

In the second instance, Allotment to all QIBs may be determined as follows: (i) In the event of oversubscription in the QIB Category, all QIBs who have submitted Bids above the Issue Price may be Allotted Equity Shares on a proportionate basis for up to 95% of the QIB Category; (ii) Mutual Funds, who have received allocation as per (a) above, for less than the number of Equity Shares Bid for by them, are eligible to receive Equity Shares on a proportionate basis along with other QIBs; and (iii) Under-subscription below 5% of the QIB Category, if any, from Mutual Funds, may be included for allocation to the remaining QIBs on a proportionate basis.

7.4 ALLOTMENT TO ANCHOR INVESTOR (IF APPLICABLE)

- a) Allocation of Equity Shares to Anchor Investors at the Anchor Investor Issue Price will be at the discretion of the issuer in consultation with the Investor and the BRLMs, subject to compliance with the following requirements:

7.5 BASIS OF ALLOTMENT FOR QIBs (OTHER THAN ANCHOR INVESTORS), NIIs AND RESERVED CATEGORY IN CASE OF OVER-SUBSCRIBED ISSUE

In the event of the Issue being over-subscribed, the Issuer may finalise the Basis of Allotment in consultation with the Designated Stock Exchange in accordance with the SEBI ICDR Regulations, 2009.

The allocation may be made in marketable lots, on a proportionate basis as explained below:

- a) Bidders may be categorized according to the number of Equity Shares applied for;
- b) The total number of Equity Shares to be Allotted to each category as a whole may be arrived at on a proportionate basis, which is the total number of Equity Shares applied for in that category (number of Bidders in the category multiplied by the number of Equity Shares applied for) multiplied by the inverse of the over-subscription ratio;
- c) The number of Equity Shares to be Allotted to the successful Bidders may be arrived at on a proportionate basis, which is total number of Equity Shares applied for by each Bidder in that category multiplied by the inverse of the over-subscription ratio;
- d) In all Bids where the proportionate Allotment is less than the minimum Bid Lot decided per Bidder, the Allotment may be made as follows: the successful Bidders out of the total Bidders for a category may be determined by a draw of lots in a manner such that the total number of Equity Shares Allotted in that category is equal to the number of Equity Shares calculated in accordance with (b) above; and each successful Bidder may be Allotted a minimum of such Equity Shares equal to the minimum Bid Lot finalised by the Issuer;
- e) If the proportionate Allotment to a Bidder is a number that is more than the minimum Bid lot but is not a multiple of one (which is the marketable lot), the decimal may be rounded off to the higher whole number if that decimal is 0.5 or higher. If that number is lower than 0.5 it may be rounded off to the lower whole number. Allotment to all Bidders in such categories may be arrived at after such rounding off; and

- f) If the Equity Shares allocated on a proportionate basis to any category are more than the Equity Shares Allotted to the Bidders in that category, the remaining Equity Shares available for Allotment may be first adjusted against any other category, where the Allotted Equity Shares are not sufficient for proportionate Allotment to the successful Bidders in that category. RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are FIPB and the RBI.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”), issued consolidated FDI Policy, which with effect from June 07, 2016 consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on June 7, 2016. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore, the Consolidation FDI Policy will be valid until the DIPP issues an updated circular.

The transfer of shares by an Indian resident to a Non-Resident does not require the prior approval of the FIPB or the RBI, provided that (i) the activities of the investee company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI (Substantial Acquisition of Shares and Takeovers) Regulations, 2011; (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI/RBI.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue.

The Equity Shares offered in the Issue have not been and will not be registered under the Securities Act, and may not be offered or sold within the United States, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act and applicable U.S. state securities laws. Accordingly, the Equity Shares are being offered and sold (i) within the United States to persons reasonably believed to be “qualified institutional investors” (as defined in Rule 144A under the Securities Act) pursuant to Rule 144A under the Securities Act or other applicable exemption under the Securities Act and (ii) outside the United States in offshore transactions in reliance on Regulation S under the Securities Act and the applicable laws of the jurisdictions where such offers and sales occur.

The above information is given for the benefit of the Applicants. Our Company and the LM are not liable for any amendments or modification or changes in applicable laws or regulations, which may occur after the date of this Prospectus. Applicants are advised to make their independent investigations and ensure that the Applications are not in violation of laws or regulations applicable to them.
